## **DETAILED ACTION**

### ***Response to Amendments***

1. Claim 8 is pending in this application. Claim 8 has been amended.

### ***Response to Arguments***

2. Applicant's arguments, see Remarks, filed 10/01/2008, with respect to the rejection(s) of claim(s) 8 under 102(e) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Mani et al. (*Understanding quality of service for Web Services*, January 2002).

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claim 8 is rejected under 35 U.S.C. 102(a) as being anticipated by Mani et al. (*Understanding quality of service for Web Services*, January 2002).

With respect to claim 8, Mani discloses transmitting a search request for a service to a management site that searches for software services provided via a

network (pg. 2, "QOS negotiation..."); obtaining a service search result including information for determining the quality of services from the management site (pg. 2, "QOS negotiation..."), wherein the information is collected by a provider that provides the software services and includes a number of times the software services have been used, a frequency of use corresponding to the software services (pg. 2, "Performance" and pg. 4, "Approaches to provide...", paragraph 1-3); an execution time corresponding to the software services and a maintenance time corresponding to the software services (pg. 2, "Performance" and pg. 4, "Approaches to provide...", paragraph 1-3); selecting at least one software service based on the obtained search result and transmitting a request to execute the selected service to the provider (pg. 2, "QOS negotiation...").
